RECOMA GROUP

On behalf of Recoma Group, I, Natale Aprile, would like to express my deepest gratitude and appreciation for ITE Uzbekistan and its team members. During the exhibition, it was clear that ITE Uzbekistan is a team full of professionals displaying high-level professionalism and organisation. Recoma Group enjoyed the exhibition, had productive and effective B2B meetings and enjoyed using the conferences to assess the Uzbek oil and gas market. In future, when we attend ITE Uzbekistan's oil and gas events, we will have high expectations, which I am sure you will exceed.

EXALO DRILLING AND G-DRILLING

The 20th anniversary OGU 2016 exhibition in Tashkent, Uzbekistan is Central Asia's key oil and gas industry event. As one of the leading European companies involved in drilling on land, this is the second time Exalo Drilling has attended this important event and presented a wide range of professional solutions and services using the newest drilling technology.

This year, Exalo Drilling participated in OGU 2016 alongside G-Drilling. Thanks to both companies' hard work, the stand was of interest to the representative of the Government of Uzbekistan and many others in the oil and gas sector, leading to the real opportunity to develop business in Uzbekistan and Central Asia. The wide range of services, extensive experience, and the large amount of modern equipment presented made a valuable impression on potential clients. Business development in Central Asia is a reflection of Exalo's strategy for further reinforcing our market position.

On top of the large number of contacts we made, Exalo's stand was awarded second place for overall participation at OGU 2016! This award will certainly give impetus to more hard work in presenting our technical opportunities. We also hope that our future stands will have the same invaluable impact in communicating with existing and potential clients.

EDNRESS-HAUSER INSTRUMENTS INTERNATIONAL AG

Overall, the exhibition took place at a high level. All our guests were impressed with the organisation.

GRAF S.P.A.

OGU is very important for GRAF and is accompanied by a high rate of development in Uzbekistan's energy industry. Meetings at the exhibition provide our specialists with the opportunity to make contact with senior management, scientists, and professionals from Uzbekistan's oil energy complex. As usual, the experienced ITE Uzbekistan team organised OGU at a very high level. Exhibiting at ITE's events is a guarantee of a productive time.

Our annual participation in OGU is not only an opportunity to discuss new projects and agree on contracts but also to meet friends and new people in a friendly atmosphere in sunny Uzbekistan. Mario Mormile, Owner, GRAF S.p.A. (Italy)

SIEMENS

We are sincerely grateful to the ITE team for their good work, professionalism and decency in preparing for OGU 2016. We hope and look forward to a good relationship in new projects. OGU is undoubtedly the most important annual event in Uzbekistan, enabling us to make contact with companies operating in the same sector. The meetings and consultations we had at the stand were very productive, targeted and fruitful, and it is largely thanks to the format of the preparation for the exhibition (advertising etc.).

Our time at the exhibition was not only successful and productive, but also very pleasant for our staff. We wish you and your company success and prosperity and hope for future cooperation.
